

Regression Models Project - Motor Trend Data 'mtcars'

Miles Per Gallon Analysis

james c walmsley

12/1/2016

I. Executive Summary:

Add after completing analysis

NOTE: include some info on cor, confint, ChisSq?, VIF

II. Problem Statement & Questions to Answer:

Q1 "Is an automatic or manual transmission better for 'mpg'?"

Q2 "Quantify the MPG difference between automatic and manual transmissions"

Grading - Criteria (remove on completion)!!!

YES!!!! Did the student interpret the coefficients correctly?

YES!!!! Did the student do some exploratory data analyses?

Did the student fit multiple models and detail their strategy for model selection?

Did the student answer the questions of interest or detail why the question(s) is (are) not answerable?

Did the student do a residual plot and some diagnostics?

Did the student quantify the uncertainty in their conclusions and/or perform an inference correctly?

Was the report brief (about 2 pages long) for the main body of the report and no longer than 5 with supporting appendix of figures?

Did the report include an executive summary?

YES!!!! Was the report done in Rmd (knitr) with pdf output?

III. Analysis Considerations:

Descriptive - (dim, mean, sd, sigma², str & summary) statistics

Exploratory - pairs, histograms, QQ, fitted, residualplots, boxplots
& (multiple plots); T-Test

Analysis - OLS, simple linear regression, statistical linear regression,
multivariate regression & model selection, logistic regression, pValues, adjustments,
diagnostics; ANOVA, coefficients, confint, correlation, covariance, variance inflation

resid

IV. Software Environment:

Set working directory:

```
setwd("~/Desktop/Coursera_R/7_Regression Models/RM_proj_MPG_MotorTrendData")
```

System - session Info:

```
sessionInfo()
```

V. Accessing Data:

Clean up the work space & get the data:

```
rm(list=ls()); data("mtcars");mtcars
```

VI. Raw Data Overview: Motor Trend ‘mtcars’ data set: Descriptive Statistics

A data frame with 32 observations on 11 variables.

```
[, 1] mpg Miles/(US) gallon  
[, 2] cyl Number of cylinders  
[, 3] disp Displacement (cu.in.)  
[, 4] hp Gross horsepower  
[, 5] drat Rear axle ratio  
[, 6] wt Weight (1000 lbs)  
[, 7] qsec 1/4 mile time  
[, 8] vs V/S  
[, 9] am Transmission (0 = automatic, 1 = manual)  
[,10] gear Number of forward gears  
[,11] carb Number of carburetors
```

VII. Process Data:

Transformationns = Factor variables 8:11; modify variable names for col 8 & 9

```
data("mtcars");for(i in c(2,8:11))mtcars[,i] <- as.factor(mtcars[,i]);mtcars[,]
```

VIII. Exploratory Analysis:

Add narrative here!!

```
data(mtcars);library(car);library(dplyr)
h1 <- sapply(mtcars, range, simplify = TRUE);h1;mu1 <- sapply(mtcars, mean, simplify = TRUE);mu1
```

```

[1] 2.638441 10.526296

Find something with levels

X. Preliminary Findings:

Questions of Interest:

A What other regressors if any correlated with mpg rating and transmission type?

B

Interpretation of Results:

A Using ANOVA table with Nested Multivariate Regression fit it is clear that the variable w

B Based on the

C

XI. Inference:

Hypothesis':

A H_0 = The difference between Automatic and Manual transmission MPG = 0

B H_a = The difference between Automatic and Manual transmission MPG $\neq 0$
C Desired confidence interval = .95 (one sided) ??

XII. Conclusions / Recommendations:

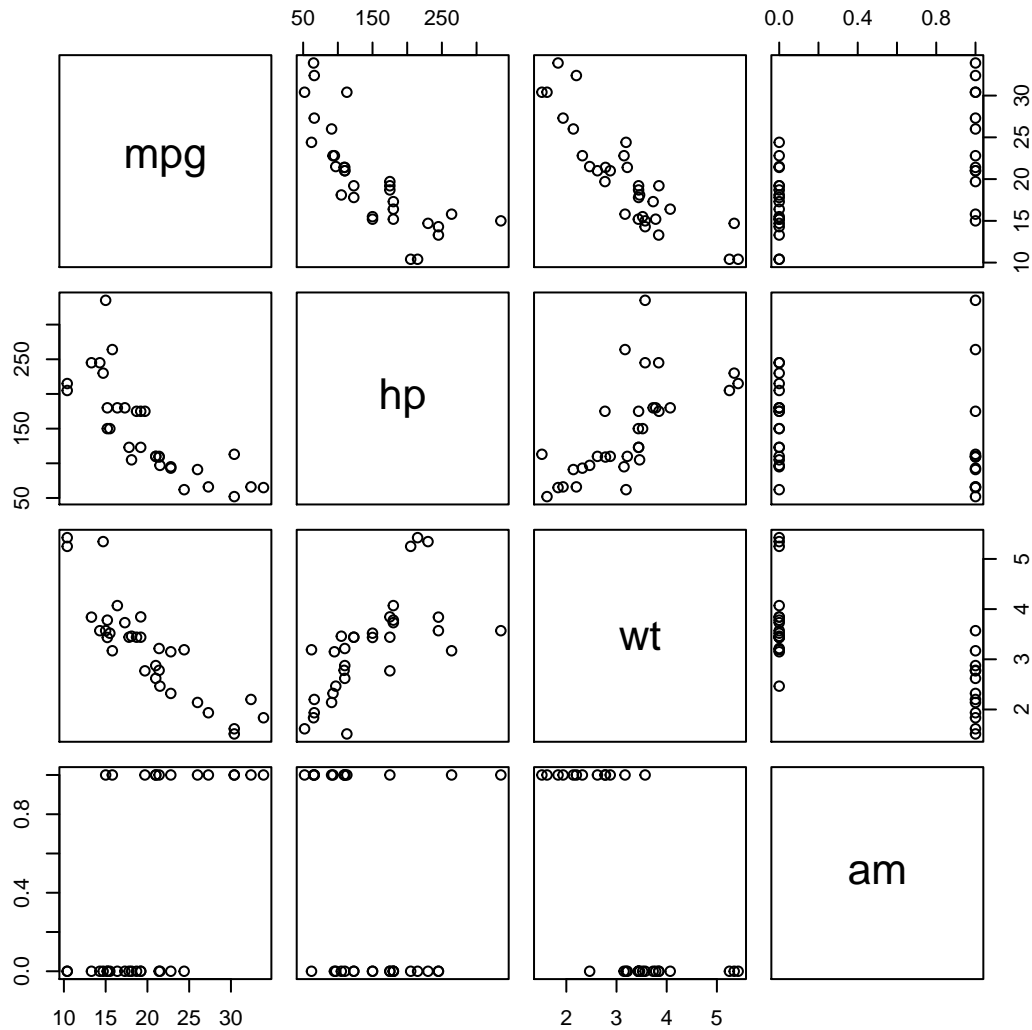

A
B

XIII. Are there other alternative analyses?

A VIF
B Challenge the results ?
C Measures of uncertainty 'e'
